TOOLS RECOMMENDED

DISCLAIMER OF LIABILITY

IF YOU ARE NOT AN AUTHORIZED SUNSTREAM DEALER AND ARE NOT A REASONABLY SKILLED MECHANIC, PLEASE CONTACT SUNSTREAM SO WE CAN REFER YOU TO A LOCAL DEALER WHO CAN SKILLFULLY AND SAFELY PERFORM THE ASSEMBLY AND INSTALLATION OF YOUR SUNSTREAM PRODUCT. IT IS THE POTENTIAL INSTALLER AND/OR ASSEMBLER'S RESPONSIBILITY TO DETERMINE WHETHER HE OR SHE HAS THE NECESSARY SKILLS, KNOWLEDGE AND TOOLS TO PROPERLY AND SAFELY ASSEMBLE AND/OR INSTALL THE SUNSTREAM PRODUCT DESCRIBED HEREIN. IMPROPER ASSEMBLY AND/OR INSTALLATION MAY CAUSE THE LIFT TO FUNCTION IMPROPERLY OR NOT TO FUNCTION. IMPROPER ASSEMBLY AND/OR INSTALLATION MAY ADDITIONALLY CAUSE A RISK TO PERSONAL SAFETY OR PROPERTY. IF THE ASSEMBLER OR INSTALLER IS CONFUSED OR HAS QUESTIONS OR CONCERNS ABOUT A PARTICULAR ASSEMBLY OR INSTALLATION, HE OR SHE SHOULD CONTACT SUNSTREAM BY TELEPHONE AT (253) 395-0500 OR (888) 786-5438 BEFORE PROCEEDING FURTHER. THE INFORMATION CONTAINED IN THESE INSTRUCTIONS, EXCEPT THE STATED WARRANTY, DOES NOT CONSTITUTE A GUARANTEE OF ANY KIND.

!CAUTION!

ONLY SKILLED INDIVIDUALS WITH PROPER TOOLS SHOULD ASSEMBLE THE HOVERCOVER. IMPROPER ASSEMBLY MAY LEAD TO PRODUCT FAILURE, SUBSTANTIAL PROPERTY DAMAGE AND/OR PERSONAL INJURY AND VOID THE WARRANTY.

HEIGHT ADJUSTMENT

Height of the HoverCover is adjusted with the Telescoping Linkages. The HoverCover has four preset positions incrementing every six inches. Figures below show the height clearances for the HoverCover.

Dimension “A” is the distance between the bottom of the boat and the frame of the HoverCover when the lift is in the up position.

Dimension “B” is the distance between the water and the HoverCover frame when the lift is in the down position. The HoverCover can be set to the following range of heights shown below.

### A

**Maximum Height** - 73"/185cm  
**Minimum Height** - 55"/140cm

### B

**Maximum Height** - 102"/259cm  
**Minimum Height** - 84"/213cm

**Maximum Boat Height**

102"/221cm

** Maximum and minimum heights are calculated from a boat model with a 21-degree dead-rise hull  
***Assumes curved windshield. Actual height will be determined by shape of boat.**
IMPORTANT SAFETY INSTRUCTIONS

If you have any questions, please call your dealer, or Sunstream at (888) 786-5438

Save These Instructions

Your safety and the safety of others is very important. Proper use of the information in this manual will help avoid potential hazards that could cause damage to property and/or personal injury. It is not possible, however, to identify and warn users of all hazards associated with the assembly, installation, operation, and maintenance of the FloatLift. You must use your own good judgment.

Failure to comply with the following rules may result in severe injury and/or death and damage to property.

1. Refer to your FloatLift™ owner’s manual to review safety specifications for your FloatLift.
2. The HoverCover moves from a raised position to a lowered position relative to your boat. In the lowered position, the HoverCover is meant to provide a close fit to your watercraft. Be aware of people in the boat and the risk of the HoverCover contacting them.
3. Be sure the HoverCover’s height range is properly adjusted for your watercraft to avoid damage to boat windshields or other high reaching fixtures.
4. Avoid putting your hands or other body parts on the HoverCover’s moving parts while the HoverCover operates. Do not let children or others contact the HoverCover’s moving parts while it operates.
5. Be aware of environmental forces while using the HoverCover. Strong winds may cause the cover to become unstable. Excessive wave action may cause the cause the cover to become unstable. Remove the fabric cover in the case of predicted extreme weather.
6. The HoverCover is a lightweight structure that is NOT designed to hold body weight. DO NOT hang from the HoverCover.
7. Always leave the HoverCover in the retracted, gravity lock lift position to prevent damage caused by wind and waves.

MAINTENANCE

1. Sunstream recommends an annual inspection by your Sunstream dealer.
2. Refer to your FloatLift™ owner’s manual to review maintenance requirements for your FloatLift.
3. Check telescoping PVC guides for binding and add light lubrication as needed. If binding continues, wrap duct tape around base of outer PVC Guide.
4. Check Velcro connections from time to time to ensure a continued tight fit.
5. Report evidence of excessive wear and tear to your Sunstream dealer or to Sunstream.
6. Remove canopy cover before snowfall.
7. Remove canopy cover if winds exceed 30 mph for a prolonged period of time.
8. Do not allow water to collect on the canopy fabric. Re-tighten tightening cords and/or adjust rafters to avoid such water collection.
9. Remove your canopy top for off-season storage or if boat is not on lift for an extended period of time.
10. Tighten nuts and bolts as needed.
Standard Warranty

WARRANTY: Sunstream Corporation (“Company”) warrants its Products for non-commercial and/or non-governmental use for a period of three (3) years, in both fresh and salt water, to the original Purchaser (“Purchaser”) against manufacturing defects in all Product materials and workmanship beginning from date of purchase of the Product from Company** under the following terms and conditions:

NOTICE REQUIREMENTS AND REMEDIES: If the Purchaser discovers a defect, the Company, or its authorized Company dealer or agent, will, at the Company’s option: (1) repair the Product, (2) replace the defective part, or (3) refund the purchase price of the Product upon confirmation by Company that the Product is defective, provided that the Company receives notice of the defect from the Purchaser or Company dealer before the warranty period lapses. Product changes caused by age or environment (such as marine growth or heat) shall not constitute a defect. Confirmation of the defect shall require that reasonable proof of the defect be provided by Purchaser to Company or Company dealer, and may include that the Product or part be returned to Company for inspection at Purchaser’s initial expense. This warranty shall not apply if Company receives notification after the before-stated deadline, regardless of when the defect occurred or was discovered, and regardless of the reason for the delay in notification. “Notification” shall be deemed to have occurred when the Purchaser or Company dealer sends written notice to Company by fax or by e-mail and when receipt is confirmed by Company’s response.

EXCLUSIONS: This warranty does not apply to damages caused by or due to: (1) accident (including, without limitation, collision, fire, flood, wind, ice or any other natural disaster or acts of God), abuse, misuse, overloading, out of level or improper boat loading (i.e.: not fully on, too far on, or crooked on lift), or (2) faulty assembly or installation if such assembly or installation was not performed by a Company employee or Company dealer. Company is not responsible for determining the weight or dimensions of Purchaser’s boat, and Purchaser is advised that published boat specifications are often inaccurate. This warranty is void if the Product has been modified without the permission of the Company or if any Company serial number has been removed or defaced. Normal maintenance requires an annual inspection of the Product by a Company employee or Company dealer, including bolts, pins, hydraulics, pump, electronics, and welds and failure to undertake such maintenance may constitute “abuse.” Lift components’ fluid level and condition, including battery water and acid, SunFluid and strainer cleaning are maintenance items and are not covered by this warranty. Zincs, ropes, batteries, cosmetic concerns and custom coatings are not covered by this warranty. Batteries supplied by Company that are maintained in top operating condition by Purchaser are warranted for a period of one (1) year. Underwater light systems and the DockJock are not warranted for use in brackish or salt water. This warranty does not void or alter any rights the Purchaser may have against dealers or suppliers of component parts.

SALT WATER REQUIREMENTS AND EXCLUSIONS: If any Company Product is used in brackish or salt water, the Purchaser agrees that proper maintenance requires that the Purchaser shall attach to the product, maintain and regularly check sacrificial anodes, also known as “zincs,” in order to prevent electrolysis from damaging the lift metals, and that failure to attach and maintain the zincs constitutes “abuse.” *** Underwater light systems and the DockJock™ personal watercraft lifts are not warranted for brackish or salt water use regardless of zinc use.*

INTERNATIONAL WARRANTY: The Purchaser agrees that if the Product leaves the borders of the United States of America, Puerto Rico or Canada, replacement parts shall be shipped with the dealer’s next container order. International dealers have the option of using parts from stock if possible to expedite response. Purchaser has the option to pay for expedited freight if desired.

LIMITATIONS: Except as expressly stated herein, there are no warranties, expressed or implied, by operation of law or otherwise, of the Product furnished under this Agreement. Seller disclaims any implied warranty of merchantability or fitness for a particular purpose. The sole remedy for liability of any kind shall be limited to the remedies provided in this warranty and shall in no event include any incidental, indirect, special or consequential damages or loss of use, revenue or profit. State law may override the above exceptions or limitations.

*Fresh water applications for underwater light systems and the Dock Jock™ winch and strap are warranted for one (1) year; salt water applications are not warranted for these Products.

**If the Product is purchased from a Company dealer, the warranty term begins upon the date the Product is sold to the end Purchaser or three (3) months from the date the Product is shipped from Company, whichever occurs first.

***Under normal conditions, zincs should last at least one (1) year. If Purchaser observes that the zincs are deteriorating in a shorter time period, an external current could be entering the system and the Purchaser must find the source of this current and stop it, or change zincs more frequently.
