New Product Announcements

FL7012 -- 7,000lb Capacity FloatLift. MSRP \$19,333

The FL7012 is built on the FL6 chassis and features an additional set of floats to create 7,000lbs of capacity. This is an ideal lift for the latest generation of heavy wakeboard boats and for adding a SwiftShield. The FL7 floats require a minimum slip width of 12'8" (versus 12' for FL6) and can be used with ballast tanks.

FA-FK7 -- FL7 Upgrade Kit. MSRP \$3,750

This kit enables an FL6 to be upgraded to 7,000lb capacity, an increase of 1500lbs. This can be installed with the lift in or out of the water.

FA-BAL1 -- FL6/7 Ballast Kit. MSRP \$645

Designed for deep-skegged wakeboard and pontoon boats, the FL6/7 Ballast Kit provides enhanced weighting to an FL6 to lower the frame approximately 4" at the crossbeam to provide additional drive-on clearance. The Ballast Kit does not diminish lift capacity since the water ballast adds weight and lowers the lift (floats and ballast above water) when loading the boat; and it is neutrally buoyant when the lift is raised (floats and tanks submerged). Each Ballast Kit features two tanks and can be installed in or out of the water.

SL7017PAR -- TriLift. MSRP \$12,178

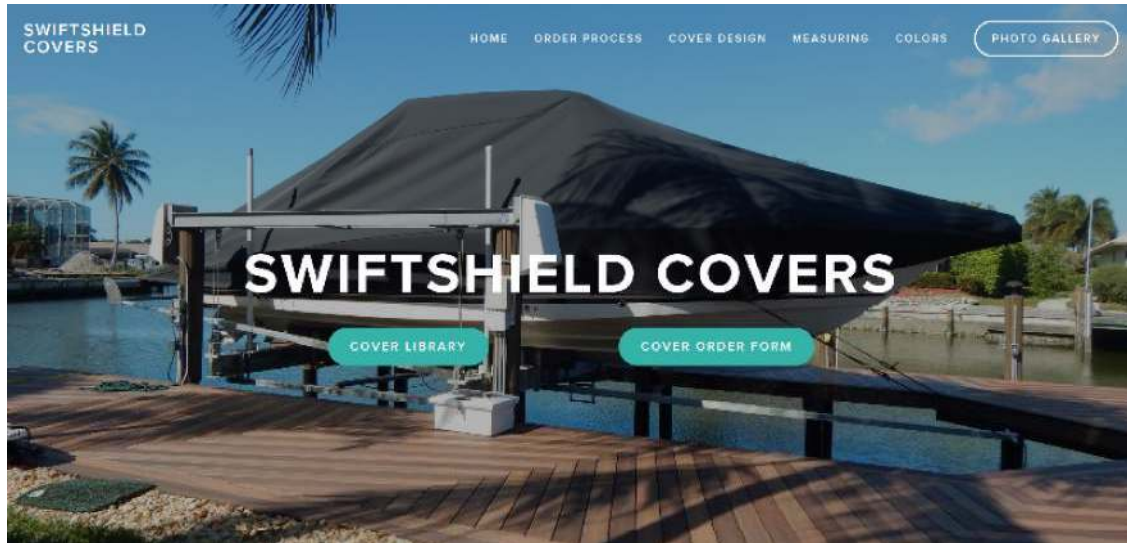

We are proud to announce the brand-new TriLift with 6,600lb capacity. Optimized for pontoon boats, the TriLift features superior hull support with 17' bunks, a 14.5' long fore/aft frame to prevent tipping, attractive aluminum and composite bunks with low friction and high durability, and an underslung bunk cross beam option to minimize the water depth required. The standard range is 48" with optional adjustable ranges of 36" and 60". Four guide-ons are included with the lift and optional bunk risers may be added to accommodate the growing trend of v-toons and irregular depth center pontoons.

SA-PB317 -- TriLift Bunk Kit. MSRP \$2,599

This kit enables an existing SL6, SL7, SL8, and SL10 to be modified to optimally accommodate pontoon boats with the benefits of the TriLift product. The fore/aft footprint is not as long as the TriLift, but the Bunk Kit allows the user the flexibility of converting the SunLift back to the standard SunLift SuperBunks to accommodate a v-hull again in the future.

SA-PB212 -- TriLift Bunk Kit for SL4. MSRP \$1,999

SwiftShield

SwiftShield sales are up 150% and customer demand is strong. We are now shipping from the southeast for fast, affordable delivery. Designs are now available for SunLift, FloatLift, piling lifts, elevators and Shorestations.

Visit the new ordering website [Swiftshieldcovers.com](https://www.swiftshieldcovers.com) for information on measuring, designing, colors, and to place your cover orders. We now offer easy click-to-pay credit card payment process
