New Product Accessory for Salt-Water

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

About a year ago, Sunstream began using a protective sock on FloatLifts to prevent barnacles in oyster-rich saltwater environments creating slices and leakage in the hoses.

If you install a SunLift or have an older FloatLift in an oyster/barnacle rich area and have issues with barnacles, the hose sock accessory LA-HP17 Hose Protector kit, 17ft. is a great solution.

Dealer Photos

This great photo has an even better story to tell. One week before Christmas Day, this SL7 SunLift was installed by drilling the front legs into the rock bed and using a full set of Sunstream Deep Water Braces. Dealer creativity and customer service at it's finest.
